

Course Title	FINANCIAL MANAGEMENT
Code	ZC6303
Status	Core
Pre-requisite	NA
Synopsis	<p>The main objective of this course is to introduce the basic concepts and techniques in corporate financial management. Students will be exposed to the theories and practice of making effective financial decisions. For this purpose, students are required to solve a number of cases and to prepare a business proposal in addition to discussing current financial issues. The topics to be covered include the time value of money, risk and return relationship, securities valuation, financial statement analysis, capital budgeting, capital structure policy, dividend policy, mergers and acquisitions and financial risk management.</p>
